## SPACE COAST TRAIL

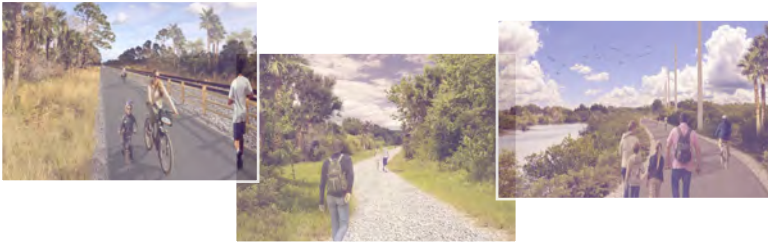

# Proposed Space Coast Trail

Located within the Merritt Island National Wildlife Refuge and Canaveral National Seashore

The purpose of this study is to evaluate the construction of a multi-use trail from Parrish Park at the entrance to the Merritt Island National Wildlife Refuge to Parking Area No. 1 within the Canaveral National Seashore and following Kennedy Parkway from Beach Road (CR 402) to US 1.

The proposed Space Coast Trail would become the eastern end of Florida's Coast-to-Coast Trail that extends from St. Petersburg on the Gulf of Mexico to the Atlantic Ocean and serve as major component of the St. Johns River to Sea Loop Trail. The proposed trail would provide non-motorized opportunities for bicyclist and hikers and expand opportunities for wildlife observation, photography, and environmental education within the Merritt Island National Wildlife Refuge and Canaveral National Seashore. Stop by anytime during the scheduled open house to learn more about the project.

## JOINT PLANNING EFFORT

The proposed Space Coast Trail is a federal planning project on the Merritt Island National Wildlife Refuge and Canaveral National Seashore, located along Florida's central east coast in Brevard and Volusia counties.

The USFWS and NPS are the co-lead agencies for the Environmental Assessment (EA) under development to evaluate the potential impacts associated with the proposal in compliance with the National Environmental Policy Act (NEPA). NASA is a cooperating agency on the EA and FDOT is a key partner in the planning, funding, and construction of the proposal. The USFWS, NPS, NASA, and FDOT are coordinating very closely on this proposal to meet all applicable rules, regulations, and policies and to facilitate public involvement.
